

NEWS BULLETIN

New for 2018

New year, New brochure.

Our 2018 brochure has now arrived.

This new look, updated brochure gives an in-depth overview of the products and services that AP Pavers are available to provide, including a full range of coloured images and full product specifications.

Here is a link to the PDF version...<http://www.appavers.co.uk/MEDIA-ARCHIVE/building-the-road-ahead-2018-pdf.html>

You can also request a hard copy free of charge by emailing ella@appavers.co.uk

If there is any further information you require then do not hesitate to give us a call and we would be happy to help.

Roller Compacted Concrete MANCHESTER AIRPORT

AP Pavers is currently onsite at Manchester Airport undertaking a large roller compacted concrete job on the runway.

Roller Compacted Concrete is now becoming increasingly popular within the UK and we are now starting to get a lot more enquiries about laying concrete.

An economical solution brought on by the rising prices of bitumen. Roller Compacted Concrete has a service life of up to 4x longer than asphalt, and because of its good durability, has a relatively maintenance free life.

AP Pavers are now at the forefront of laying concrete. Using our VOGELE pavers with high compaction screeds, we can achieve approximately 95% precompaction before any roller passes.

Give us a call on 01889 560920 if you are interested in laying concrete and would like some more information on how best to achieve the best possible result.

2 New Welfare Vans

AP Pavers are continuing to invest for the future, and have just ordered 2 new welfare vans that will be for our surfacing gangs.

As an essential piece of equipment within the construction industry, welfare vans are especially valuable when our team are working in more rural areas.

Boasting an impressive number of features, including full canteen facilities as well as a toilet, sink and drying room - these welfare vans are modern and comfortable, and are an integral piece of equipment for our teams.
